Education

McGill University August 2024 – Present
Bachelor of Science in Computer Science *Montreal, QC*
- Coursework: Data Structures and Algorithms, Software Systems, Linear Algebra, Calculus, Discrete Math

Skills

Languages: Python, C/C++, Java, TypeScript, JavaScript, SQL, Bash, HTML/CSS
Frameworks & Cloud: React, Next.js, FastAPI, Flask, Express, AWS (Lambda, DynamoDB, SAM), Supabase, Vercel
Tools: Git, GitHub, BitBucket, Jira, Confluence, Linux, Docker, pytest, CMocka, Playwright, MongoDB
AI & APIs: Claude API, Gemini API, Google ADK, OpenAI, ElevenLabs, Whisper
Spoken: Fluent in English, French, and Mandarin

Work Experience

SWE & Tools Developer May 2026 – Present
Ciena (Co-op, extended part-time) *Ottawa, ON*
- Built an AI PR reviewer agent that runs on Bitbucket webhooks and approves PRs or leaves suggestions
- Built an AI merge conflict resolver agent that analyzes conflicting branches and proposes resolutions

Software Developer Intern May 2025 – September 2025
Ciena *Ottawa, ON*
- Developed an AI memory leak detection and analysis agent in C, and delivered demos and tutorials on it
- Implemented Sherlog, a system logging facility in C/C++ and Python
- Wrote unit tests in C with CMocka to verify code quality and design
- Maintained and integrated the software repository in Git and BitBucket

Experience Coordinator September 2026 – Present
McHacks *Montreal, QC*
- Coordinating participant experience and event logistics for McHacks, McGill's hackathon

Projects & Hackathons

Ming | *Next.js, Claude API, Google Cloud TTS, Whisper, Supabase* June 2026 – Present
- Building an AI Mandarin coaching app with persona-based AI coaches and voice I/O, deployed on Vercel
- Kept LLM cost per message flat with server-side per-user daily caps, trimmed context, and capped replies

Stash | *Python, AWS Lambda, DynamoDB, AWS SAM* October 2026
- Built a serverless link saver on one AWS Lambda and DynamoDB table, deployed with AWS SAM in the free tier
- Hardened link previews against SSRF; added CloudWatch alarms, SNS alerts, and a zero-spend budget alarm
- Tested with pytest and moto against mocked DynamoDB; added a Google ADK agent as a container Lambda

Pinky | *Next.js, TypeScript, Supabase, Postgres, Vercel* October 2026
- Built a live app where friend groups make accountability pacts, check in daily, and pay a shared pot on misses
- Enforced streaks, escalating stakes, and photo-proof challenges with Postgres functions and row-level security
- Deployed on Vercel with a daily reminder cron job and web push notifications

TFSA Investment Teacher | *Python, FastAPI, React, TypeScript* September 2026 – October 2026
- Built a deterministic stock scoring model that rates TSX and US stocks and explains each score in plain English
- Modeled TFSA contribution room and US dividend withholding tax in a FastAPI backend with a React frontend

Dishly (cuHacking7) | *React, Vite, Express, Gemini API, Spoonacular API, Playwright* July 2026
- Built a swipeable recipe app on an Express backend using Gemini for meal goals and Spoonacular for recipes
- Wrote Playwright browser-to-backend integration tests and documented the API with OpenAPI

AI Mock Interviewer (McHacks13) | *Python, Flask, Gemini API, ElevenLabs API* January 2026
- Built an AI mock interviewer that generates questions from a given resume and analyzes answers with Gemini
- Converted questions to speech with ElevenLabs and handled client-server data flow with Flask routing
