EDUCATION

McGill University

August 2024 – Present

BSc, Bachelors of Science in Computer Science

Montreal, QC

- Relevant Coursework: Data Structures and Algorithms, Software Systems, Linear Algebra, Calculus, Discrete Math

West Carleton Secondary School

September 2020 – June 2024

High School Diploma

Ottawa, ON

- Graduated with High School Diploma with Distinction, OCDSB's Silver Medal Award, and Distinction in Advanced Functions
- Completed computer science courses with a focus on Python, C, Java, and HTML

SKILLS

Programming Languages: Python, C/C++, Java, HTML, Bash

Tools and Platforms: Git, GitHub, MS Office Suite, Google Docs Suite, Teams, Zoom, BitBucket, Confluence, Jira, Linux, Windows, Copilot, CMocka, Google ADK, Gemini API, ElevenLabs API, MongoDB, VSCode

Languages: Fluent in English, French, and Mandarin

Other Skills: Strong mathematical aptitude, problem-solving, and analytical thinking

WORK EXPERIENCE

SWE & Tools Developer

May 2026 – Present

Ciena (Co-op, extended part-time)

Ottawa, ON

- Developed AI memory leak detection and analysis agent in C
- Delivered demos and tutorials on AI memory agent

Software Developer Intern

May 2025 – September 2025

Ciena

Ottawa, ON

- Implemented system logging facility Sherlog in C/C++ and Python
- Implemented unit tests to verify code quality and design in C
- Maintained and integrated software repository in Git and BitBucket

Experience Coordinator

September 2026 – Present

McHacks

Montreal, QC

- Coordinating participant experience and event logistics for McHacks, McGill's hackathon

Co-op Student

July 2022

Coder Sports Academy

Ottawa, ON

- Assisted in teaching coding fundamentals to students in Python, enhancing communication and instructional skills
- Supported the development of coding exercises and learning materials

PROJECTS

Ming | *Next.js, Claude API, Google Cloud TTS, Whisper, Supabase*

June 2026 – Present

- Building an AI-powered Mandarin coaching app with persona-based AI coaches; implemented voice I/O with Google Cloud TTS and Whisper, deployed on Vercel with a Supabase backend

TFSA Investment Teacher | *Python, FastAPI, React, TypeScript*

In Progress

- Building an educational stock screener and TFSA planning tool with a deterministic, non-LLM scoring model and Canadian tax-sheltered account logic

ADK Research Crew | *Google ADK, Gemini API, Python*

In Progress

- Building a multi-agent AI research pipeline with researcher, summarizer, and critic agents collaborating via Google Search grounding

Blog Generator | *Python, OpenAI, Git, GitHub*

December 2025

- Uses OpenAI and Python to generate a blog based off any given prompt

cuHacking7: Dishly | *React, Vite, Express, Gemini API, Spoonacular API, Playwright* July 2026

- Built a full-stack recipe discovery app where users describe a meal goal and swipe through matching recipes
- Implemented an Express backend using Gemini to interpret user goals and Spoonacular to find recipes
- Added nutrition and dietary filters with a swipeable card interface in React
- Wrote Playwright browser-to-backend integration tests and documented the API with OpenAPI

McHacks13 | *Gemini API, ElevenLabs API, Git, GitHub, Python, Flask* January 2026

- Designed an AI mock interview based on a given resume
- Implemented Gemini AI to generate responses and analyze responses
- Implemented ElevenLabs API to convert text to speech
- Implemented Flask routing to manage seamless data flow between the client and the server

CodeJam15 | *Java, Git, GitHub, OOP/OOD, File I/O* November 2025

- Created minigame GUI where the highscore is tracked
- Utilized Object Oriented Programming to code the games
- Implemented a leaderboard system using File I/O
