Education

McGill University Expected May 2028

Bachelor of Science in Computer Science *Montreal, QC*

- Coursework: Data Structures and Algorithms, Software Design, Software Systems, Computer Systems

Skills

Languages: Python, C/C++, Java, TypeScript, JavaScript, SQL, Bash, HTML/CSS
Frameworks & Cloud: React, Next.js, FastAPI, Flask, Express, AWS (Lambda, DynamoDB, SAM), Supabase, Vercel
Databases & Tools: PostgreSQL, MongoDB, Git, Bitbucket, Jira, Linux, Docker, pytest, CMocka, Playwright
AI & APIs: Claude API, LiteLLM, OpenAI, Gemini API, Google ADK, ElevenLabs, Whisper
Spoken: Fluent in English, French, and Mandarin

Work Experience

SWE & Tools Developer May 2026 – Present

Ciena (Co-op, extended part-time) *Ottawa, ON*

- Built an AI PR review agent in Python on Claude Sonnet, triggered by Bitbucket webhooks across many repos
- Guarded against hallucinations: every finding must quote an exact diff line and cite symbols confirmed via grep
- Gave it grep and file-read tools on a cloned branch (10-call cap), plus pre-flight filters for known false positives
- Used daily by senior engineers, leads and managers; approves clean PRs and flags only critical/high-severity bugs
- Built an AI merge conflict resolver that resolves conflicts between two branches and raises a Jira-linked PR

Software Developer Intern May 2025 – September 2025

Ciena *Ottawa, ON*

- Built an AI agent that detects and explains memory leaks in C code, and ran demos and tutorials for engineers
- Implemented Sherlog, a system logging facility in C/C++ and Python, unit tested with CMocka

Experience Coordinator September 2026 – Present

McHacks *Montreal, QC*

- Coordinating participant experience and event logistics for McHacks, McGill's hackathon

Projects & Hackathons

Ming | *Next.js, Claude API, Google Cloud TTS, Whisper, Supabase* June 2026 – Present

- Building an AI Mandarin coaching app with persona-based AI coaches and voice I/O, deployed on Vercel
- Kept LLM cost per message flat with server-side per-user daily caps, trimmed context, and capped replies

Stash | *Python, AWS Lambda, DynamoDB, AWS SAM* October 2026

- Built a serverless link saver on one AWS Lambda and DynamoDB table, deployed with AWS SAM in the free tier
- Hardened link previews against SSRF; added CloudWatch alarms, SNS alerts, and a zero-spend budget alarm
- Tested with pytest and moto against mocked DynamoDB; added a Google ADK agent as a container Lambda

Pinky | *Next.js, TypeScript, Supabase, Postgres, Vercel* October 2026

- Built a live app where friend groups make accountability pacts, check in daily, and pay a shared pot on misses
- Enforced streaks, escalating stakes, and photo-proof challenges with Postgres functions and row-level security
- Deployed on Vercel with a daily reminder cron job and web push notifications

Hackathons | *cuHacking7, McHacks13* January 2026 – July 2026

- Dishly: swipeable recipe app on Express with Gemini, plus Playwright browser-to-backend integration tests
- AI Mock Interviewer: Flask app that builds interview questions from a resume with Gemini, voiced by ElevenLabs
